

Site Supervisors Safety Training Scheme (SSSTS)

Who is the course for?

This course is aimed specifically at site foremen and supervisors of any trade on any site from the smallest of refurbishments or extensions to the largest of multi £million projects.

Why must I attend?

This course is a requirement of BUILD UK training standards and is recognised throughout the industry as the appropriate training level for site supervisors.

Course Benefits

This course will give those who have direct control over site safety the tools they need to look after their team. We will also focus on the importance of cooperating with others that they are working close to.

Supervisors have many questions, we will answer these and many more during this engaging, lively 2 day course.

- Just how much responsibility do I have?
- What is CDM and how does it affect me?
- What is a toolbox talk and how do I give one?
- What do I need to know about safety issues?
- What do I need to know about health?
- What happens if there's an accident?

Assessment

Delegates will be required to prepare and deliver a short toolbox talk to a small group (following guidance and support).

They is also a multiple choice exam at the end of the course.
