

Fire Warden/Fire Marshall

½ day course

Who is the course for?

- Individuals who are required to act as Fire Wardens/Fire Marshalls in the workplace.
- Those who may need to take charge in case of fire and help to clear a building.
- Those who have responsibilities for fire prevention in the workplace.
- Those who carry out “hot works” as part of their job (such as soldering, welding, cutting or grinding).

What's in the course?

Fire Warden training from HCS Safety gives delegates an insight into the causes of fires and how they can be prevented, whilst looking at the legal requirements for fire management and procedures for evacuating a building.

Delegates will understand how fires start, how they spread, how people tend to behave, and how to deal with the situation safely.

Good management...

Good safety management is all about preventing things from going wrong, but we also must be able to deal with the situation if they do.

In the event of a fire, we all need to know that someone will take charge and clear the building safely and efficiently. Fire wardens also have vital duties in fire prevention.

Assessment

The practical session will test abilities in selection and use of fire extinguishers. There is a multiple choice test at the end of the course.

Course Duration

½ day

Refreshers

We advise that you renew your training after 3 years

You will need...

Sensible clothes and footwear.

The practical element of this course will involve being outside using fire extinguishers so please be prepared to have a go and dress for the weather.

If it is raining, we will still do the training!

Visit www.hcssafety.co.uk for dates and prices

Fire Warden/Fire Marshall Course Programme Guide
